Guidelines for speakers at the General Mathematics Colloquium

The organizers of the `Algemeen Wiskunde Colloquium’ aim, by their choice of subjects and speakers, to make the lectures memorable for the audience, both with regards to the contents and to the style of presentation.

The `Algemeen Wiskunde Colloquium’ is held on Wednesdays in the meeting room of KdVI, Science Park 105-107, 3th floor, room F3.20.

The lecture starts at 11.15 and ends approximately at 12.15: roughly 55 minutes for the presentation + 5 minutes questions. The audience has a general mathematical background, please adapt the level of the, say, first 30 minutes of your presentation to this audience and postpone the more detailed aspects to the last part of your talk. A blackboard and an overhead projector are available in the lecture room. You may use them separately or in combination. In case you prepare transparencies for the overhead projector, please don't write or print too small, certainly if you use latex prepared typeset material. Afterwards, at 12.30, there will generally be a lunch in the common room, intended for all members of the Institute and, of course, the speaker.

Submitting Title and Abstract: Please submit the title of your lecture (in English) at least 4 weeks in advance. Preferably submit your abstract (in English) at the same time. Send these data by email to the organizer who invited you. Please submit an abstract of moderate length which is suitable for web announcement (avoiding dollar signs and other TeX stuff). Optionally you may additionally submit an abstract containing TeX strings, which we then will use for the hardcopy announcement. The colloquium lectures are announced as an event on the web: www.kdvi.uva.nl, and are also to be found under “Research” > Colloquia.

A description how to reach the building can also be found at the KdVI site. In case of problems or questions don't hesitate to contact one of the organizers.
