

Guidelines for speakers at the General Mathematics Colloquium

The organizers of the General Mathematics Colloquium aim, by their choice of subjects and speakers, to make the lectures memorable for the audience, both with regards to the contents and to the style of presentation.

The General Mathematics Colloquium is held biweekly on Wednesdays in the meeting room of KdVI, Science Park 105-107, 3th floor, room F3.20

The lecture starts at 16.00 and ends approximately at 16.45: roughly 45 minutes for the presentation + 15 minutes questions. The audience has a general mathematical background, please adapt the level of the, say, first 30 minutes of your presentation to this audience and postpone the more detailed aspects to the last part of your talk. A blackboard and beamer are available in the lecture room. You may use them separately or in combination. After the presentation and questions, there will be drinks and snacks in the common room.

The colloquium lectures are announced as an event on the web: www.kdvi.uva.nl, and are also to be found under "Research" > Colloquia. A description of how to reach the building can also be found at the KdVI site. In case of problems or questions don't hesitate to contact one of the organizers.
